- Pitched and onboarded new clients, expanding the brand's portfolio by 43% within 6 months.
- Designed & developed component for design system to deliver cohesive user experience aligning with business goals & user needs.

### User Experience Designer

January 2022 – March 2023

#### SRG Hospitals

Gujarat, India

- Led cross-functional teams in researching and analyzing market trends, driving feature development like profile lookup and access to medical records and shaping the product roadmap that increased the user trust and reliability rating by 30%.
- Utilized user research insights to drive design decisions & develop intuitive user flows, introduce 4 features, & optimize use cases, improving search experience across SaaS & B2B products.
- Established simple and intuitive user experiences, contributing to a 30% decrease in bounce rates.

## PROJECT EXPERIENCE

### CulTour (A digital platform to explore different cultures through various cuisines)

- Developed a cross-platform application, facilitating the people of Boston to explore cultural events and related experiences around them with the help of filters, GPS and intuitive interface that starts off after having a meal at a restaurant in nearby vicinity. The market study suggested it would lead to an increase in the restaurant loyalty programs by 44% and increase footfalls in restaurants by 88%.
- The model created paths taken by people from a particular restaurant in order to explore the area around them – creating 50+ data points for restaurants, entertainment industry and even the users to explore the area around better.

### Solis: An automated Solar panel cleaner

- Spearheaded the development of a complex wiring, coding and 3D mesh forming of a device used for cleaning solar panels.
- Collaborated closely with stakeholders to comprehend niche business needs, particularly around high-risk situations, and elevated customer satisfaction by providing demos of the product.
- Seamlessly integrated 4 wire system that is used in CNC models to control the device through IoT and developed a prototype application to run it increasing the customer engagement by 62% and doubled the ease of operating the device.
